PROFESSIONAL SUMMARY

Senior DevOps/SRE engineer with 14 years of experience in infrastructure automation and platform engineering. Architected full-stack IaC systems spanning bare-metal (BMaaS), private cloud (CloudStack), and multi-cloud environments (AWS / Alibaba Cloud / Huawei Cloud / ChinaTelecom Cloud). Engineered a custom multi-cloud Terraform Provider in Go and led end-to-end domestication of Anolis OS ARM, UOS (Hygon C86), and OpenEuler platforms across x86/ARM64/C86 architectures. Holds AWS SAA, CKA, RHCE, Azure Admin, and PMP certifications.

TECHNICAL SKILLS

Cloud Platforms: CloudStack · AWS · Alibaba Cloud · Huawei Cloud · ChinaTelecom Cloud · Proxmox VE

Container Orchestration: Kubernetes · Docker · Helm · Harbor · JFrog Artifactory

IaC & Automation: Terraform (custom Provider) · Ansible · Packer · Tinkerbell · cloud-init

Storage: ZFS · DRBD · Linstor · LVM · Corosync/Pacemaker

Networking: L4/L7 LB · BGP · VLAN · OVS/DPDK · PXE/iPXE · Redfish

Observability: Grafana · Prometheus · Loki · Fluentd · Zabbix

Security & Compliance: Vault · Nessus · Lynis · Consul ACL · SSL/TLS · Trivy

CI/CD: GitLab CI · Jenkins · Goss · Ansible Tower

Operating Systems: Ubuntu · Anolis OS · UOS · OpenEuler · Windows (x86/ARM64/C86)

Languages: Go · Python · Shell/Bash · HCL

PROFESSIONAL EXPERIENCE

Shenzhen JetDev Technology Co., Ltd. — DevOps Team Lead & Delivery Efficiency Expert

Oct 2024 – Present | Shenzhen, China

Orchestrated 7 parallel projects simultaneously (BMaaS, Terraform, Image Factory, CloudStack, K8s, IT Infrastructure, JetDev), driving technical architecture and delivering across 5+ customer sites.

Platform Engineering

- Spearheaded development of JetDev, an all-in-one DevOps toolbox integrating Ansible, Terraform, Packer, and GitLab Runner; reduced Ansible Role project scaffolding time by **80%** and established a fully traceable workflow from code review to production deployment, adopted across operations and QA teams.
- Engineered a unified multi-cloud Terraform Provider in Go, supporting AWS, Alibaba Cloud, Huawei Cloud, and ChinaTelecom Cloud; implemented CloudStack resource orchestration via AWS-compatible API, eliminating multi-cloud configuration fragmentation and achieving "write once, run anywhere" IaaS provisioning.
- Architected and delivered a CloudStack private cloud platform on ZFS + Linstor distributed storage (DRBD 9.3.0) and VLAN advanced networking; completed **13 core feature deliveries**; boosted ZFS IOPS from **230k to ~800k** on PCIe 5.0 (32-core); resolved DRBD heartbeat issues for **24/7 stable operation**; deployed Grafana dashboards for real-time resource visibility.

Automation Systems

- Redesigned the automated image factory (Packer) to support **5 OS types × 3 architectures** (x86_64 / ARM64 / C86); integrated Goss smoke testing and Lynis security auditing; improved concurrent build throughput by **3.2×**, maintained zero pipeline failures for **30+ consecutive days**, and completed **12 image delivery tasks**.
- Engineered deep enhancements to the BMaaS bare-metal provisioning platform: added automatic disk selection, multi-NIC dynamic bonding, pluggable HookOS driver framework, Rescue mode, and offline provisioning; delivered end-to-end OS deployment for a new Yangzhou Telecom site across x86/ARM64/C86.
- Designed and deployed multiple GitLab CI/CD pipelines: full-chain image factory automation (build / push / notification); Ansible "commit-to-test" pipeline with dynamic VM spin-up; IaC MR approval workflow enabling automated, auditable cloud resource provisioning.

Domestication & Storage Performance

- Led full-stack adaptation for domestic OS platforms: completed Anolis OS 8 ARM JetIce image packaging (including HA stack: ZFS / DRBD / Corosync / Pacemaker); validated ZFS module compilation on UOS (Hygon C86) and OpenEuler; enabled standardized delivery across multiple domestic platforms.
- Directed storage performance engineering: designed and executed fio benchmark suites across **6 test scenarios** (PCIe 3.0 vs 5.0); produced attributable performance reports; completed ZFS thin-provisioning evaluation and Linstor replica migration strategy validation.
- Delivered L4/L7 load balancer performance testing; completed L4LB containerization to Docker and BGP dynamic routing migration.

Customer Delivery & Technical Support

- Led multi-site customer delivery and on-site troubleshooting: root-caused network packet loss at Aerospace Institute JetIce deployment (NIC driver / kernel / DPDK / OVS); remediated **6 critical CVEs** at Xiamen Telecom (including CVE-2023-27350); achieved full-site Consul ACL security baseline at Jishan Digital Living.
- Orchestrated company-wide network infrastructure overhaul: full IP inventory, VLAN segmentation, DNS/DHCP policy, IPv4 address pool standardization; delivered **19 IT infrastructure tasks**.
- Drove K8s cluster platformization: validated Cluster API + CloudStack architecture; planned Velero + MinIO backup and DR drills; migrated JumpServer to K8s via Helm Chart with production SSL upgrade.

Kyndryl Shenzhen (IBM Spin-off) — SRE Engineer, Toolchain

Sep 2021 – Aug 2024 | Shenzhen, China

IBM Shenzhen — SRE Engineer, Toolchain

Mar 2017 – Sep 2021 | Shenzhen, China

- Achieved "Exceeds Expectations" performance rating for **6 consecutive years**; managed cross-cultural teams of **4–10 engineers** across China and India.
- Built a comprehensive operations automation framework: improved team efficiency by **50%+**, elevated operations quality by **90%+**, reduced application deployment time by **80%**, and cut change request processing time by **50%+**.
- Administered full DevOps toolchain (Chef / GitLab / Jenkins / Ansible Tower / UCD); developed shared Ansible and Chef base libraries for business SRE teams.
- Served on the **AWS Architecture Advisory Team**: re-architected a client global ECS monolith into an EKS cluster deployment, introduced AWS Global Accelerator, and decoupled storage and database layers to resolve cross-region latency and cost issues.

Tianjin En'en Technology Co., Ltd. — Change Service Delivery Manager

May 2016 – Mar 2017

- Automated change management processes using Excel macros and scripts, reducing team workload by **80%** and enabling fully automated monthly reporting.

DXC Technology — WebHosting Team Lead / Operations Engineer

Jun 2012 – May 2016

- Led a **4-person international team** (China/India) delivering middleware operations for AIA Insurance across Asia-Pacific; raised automation coverage from **10% to 50%**.
- Delivered multiple complex projects including data center migrations, site splits, and system builds; successfully migrated client systems from IBM WAS 6 to WAS 8.

CERTIFICATIONS

AWS Solutions Architect – Associate (Nov 2022) · CKA (Aug 2021) · RHCE – Ansible 2.9 / RHEL 8 (Jun 2022) · Azure Administrator Associate (Apr 2022) · Alibaba Cloud ACP (Jul 2021) · PMP (Nov 2017) · ITIL® Foundation (Feb 2017) · IBM WAS Network Deployment V8.0 (Aug 2014)
